About

I have completed my Bachelor's in Engineering (Information Technology) from Mumbai University. During my studies, I gained extensive practical experience and knowledge in software engineering-related subjects such as Data Structures, Algorithms, Data Mining, Big Data, and programming in JavaScript and Python. These courses provided me with a solid foundation in computer science and software development principles.

Beyond technical skills, I possess strong interpersonal and communication skills crucial for effective collaboration within a software development team.

I can [accept payment in cryptocurrencies](#).
