Skills

Python
Javascript
Node Js
GIT
HTML

CSS
Data Analysis
Machine Learning
Basic Knowledge of financial markets.

About

I have completed my Bachelors in Engineering (Information Technology) from Mumbai University. During my studies, I gained extensive practical experience and knowledge in software engineering-related subjects like Data Structures, Algorithms, Data Mining, Big Data, and Programming in C++ and Python. These courses provided me with a solid foundation in computer science and software development principles.

Beyond technical skills, I have strong interpersonal and communication skills crucial for effective collaboration within a software development team. I value open communication, feedback, and knowledge sharing, considering myself a team player. I flourish in a collaborative environment that promotes innovation and continuous learning.
